

Red River Solutions

Michael Stewart, President, Tammy O'Connor, CEO

How healthy are your Oracle-based IT Systems? Perhaps it's time for a "HealthCheck."

"The Oracle Applications world is upgrading to Oracle database 11gR2 and Release 12," says Michael Stewart, president of Red River Solutions. "If your company uses an older Oracle Application product for ERP, PPM, CRM, HCM, or Supply Chain, such as E-Business Suite Release 11i, you need to be prepared. Our expert "doctors,"—highly experienced business and technical consultants— can perform an in-depth IT system HealthCheck, both functionally and technically, that will help you upgrade cost effectively with optimal results."

"A HealthCheck is a required activity for any corporation contemplating upgrading their Oracle Applications environment specifically the Oracle E-Business Suite," says John Stouffer, Oracle ACE and Oracle Applications User Group board member and an author of several books and articles on Oracle Applications software.

Whatever size or type of IT endeavor your company is facing, acquiring support and guidance from seasoned professionals can significantly improve your chance of success. The Red River Solutions team is positioned to provide you extensive benefits via its service offerings and strategic solutions including:

- Industry and business process improvements
- Executive technology advisory services
- Talent resources/technology consulting

Whether you're a small, growing organization or a Fortune 500 company, Red River Solutions is committed to providing business and technology solutions that fit your needs.

To learn more about Red River Solutions and how a HealthCheck can support and help your organization, call 972.715.6110 or visit redriversolutions.com.
